● Not operated by Gassco

### Onshore facilities

- Kårstø gas processing plant, Norway
- Kollsnes gas processing plant, Norway
- Nyhamna gas processing plant, Norway
- Vestprosess gas processing plant, Norway
- Tjeldbergodden gas receiving facilities
- Emden receiving terminal, Germany
- Dornum receiving terminal, Germany
- Dunkerque receiving terminal, France
- Zeebrugge receiving terminal, Belgium
- St Fergus receiving terminal, UK
- Easington receiving terminal, UK

### Riser/compressor platforms

- Draupner S/E
- Sleipner Riser

### Areas and tariffs

The transport system is divided into areas, with fixed tariffs for transport and/or processing within each of these.

Gassco operates one of the world's most extensive and integrated transport systems for natural gas. This includes 8598 kilometres of pipelines as well as platforms, processing plants and receiving terminals. Gassco works to ensure the best possible utilisation of the gas transport system. It also coordinates efforts to expand Norwegian gas transport capacity through the planning and development of new infrastructure.
