

GASSCO

HSE&Q

policy

Gassco secures energy supply through sustainable operation and development.

Risk for people, the environment and material assets must be understood and managed.

The requirements and expectations of our stakeholders will be met in an effective, neutral and ethical manner.

H: We will have a working environment which, based on our values, promotes commitment to the job and productivity – and which prevents occupational illnesses and injuries.

S: Our goal is zero accidents and no harm to people, the environment or material assets.

E: We will conduct our business in line with the sustainability principles.

Q: Our management system describe our corporate governance and will ensure sustainable development and operation in accordance with applicable legislation, statutory regulations and established goals.

Everyone has a responsibility to help us reach our objective of outstanding HSE&Q results.

We expect all our stakeholders to share our goals and values.
